

DefeNd™

Premium granulated stabilized nitrogen Premium Grade (SGN 200)

Product Features

- DefeNd™ contains two inhibitors that reduce nitrogen loss to ammonia volatilization and nitrate leaching.
- Formulated for the soil where leaching is the primary concern with Triple-action control against volatilization, denitrification and leaching.
- Protects against surface losses.
- Breakthrough formula applies DCD and NBPT in significant quantity to urea with no residual wetness.
- Contains 35% Active Ingredient (5% NBPT/30% DCD).
- Using nitrification inhibitors will allow nitrogen to stay in ammonium form longer than non treated products. Ammonium forms of nitrogen are less likely to leach than those in nitrate forms.

Turf Benefits

- Using DefeNd™ technology will increase the length of availability of applied nitrogen.
- Extremely soluble source of stabilized nitrogen to help promote even growth of turfgrass plants. Can be used in dry or liquid fertilizer blends.
- A stabilized source of Nitrogen such as DefeNd™ can help to reduce the amount of clippings by minimizing growth flushes often associated with non-stabilized nitrogen sources.
- Using DefeNd™ reduces nitrogen losses allowing for more uptake over a longer period of time for the plant

Guaranteed Minimum Analysis %

Nitrogen	(N)	46.0
----------	-----	------

Derived From: Urea, Dicyandiamide and N-(n-butyl)-thio-phosphoric triamide.

Product Characteristics

Product Code:	T000322
Product Type:	Stabilized Nitrogen
Particle Size:	Premium SGN 200
Bulk Density:	753 kg/m ³ (47 lb/ft ³)

DefeNd™
