75% Methydure® & 25% ISODURE™

Professional turf fertilizer for greens and tees.
Micro greens grade (SGN 100)

Product Features

- 75% of the nitrogen is derived from Methydure® methylene urea.
- 25% of the nitrogen is derived from Isodure™ isobutylidene diurea slow release fertilizer.
- Highly visible granules allow for ease of application.

Turf Benefits

- Methydure® slow release nitrogen is a trusted technology that has a gradual, consistent release and longevity that allows for the effective feeding of turfgrass with fewer applications for up to 12 to 16 weeks.
- Isodure™ nitrogen is released through hydrolysis which means it performs consistently regardless of soil temperature. Isodure nutrient release is in line with nutrient demand and turfgrass growth.
- Micro-prill fertilizer. Use of micro-prills results in an optimum distribution of fertilizer granules per unit area for a uniform nitrogen application and release.
