40% Isodure™ SOP, Fe & Micros

Professional turf fertilizer for tees and fairways.
Mini fairway grade (SGN 145)

Product Features

- 40% of the nitrogen is derived from Isodure™ isobutylidene diurea slow release fertilizer.
- High rate of potassium. All of its potassium is in the safer sulfate form.
- Contains micronutrients in the sucrate form.

Turf Benefits

- Balanced nitrogen and potassium formulation to promote healthy, stress resistant turf.
- Isodure™ is a premium quality slow release nitrogen source. It delivers high levels of efficient, available water insoluble nitrogen (WIN). Benefits include reduced nitrogen loss, reduced thatch build-up and a reduction in surge growth all season long.
- Isodure™ contains more water insoluble nitrogen WIN (89%) than any other slow-release nitrogen source resulting in prolonged, gradual feeding for optimal turf quality.
- Isodure™ nitrogen is released through hydrolysis which means it performs consistently regardless of soil temperature. Isodure nutrient release is in line with nutrient demand and turfgrass growth.
- Contains a balanced mixture of boron, copper, iron, manganese and zinc to prevent nutrient deficiencies. Particularly useful in sandy soils.
