100% UMAXX® & SOP

Professional turf fertilizer for tees and fairways.
Mini fairway grade (SGN 145)

Product Features

- 100% of the nitrogen is from UMAXX® stabilized nitrogen. UMAXX contains two inhibitors that reduce nitrogen loss to ammonia volatilization and nitrate leaching.
- High rate of potassium. All the potassium is in the safer sulfate form.

Turf Benefits

- Balanced nitrogen and potassium formulation to promote healthy, stress resistant turf.
- According to research, at least 30 percent of the nitrogen from urea can be lost to the atmosphere through volatilization within days of application.
- Urease inhibitor in combination with the nitrification inhibitor in UMAXX urea significantly increases nitrogen absorption by turfgrass to provide uniform growth, deep root mass and consistent color intensity over 12 to 16 weeks.
- UMAXX performs consistently regardless of soil temperature or weather.
- UMAXX dissolves rapidly eliminating fertilizer loss due to mower pick-up.
- Provides a high rate of potassium for improved drought tolerance, greater disease resistance and improved wear tolerance.
- Designed for use on tees and closely mowed fairways. Mini-sized particle provides excellent distribution at lower application rates.

Directions For Use

- Read the entire label before use.
- Apply only as directed during the growing season.
- Apply only to dry foliage.
- Irrigate after application, especially during periods of high temperatures (80°F or above). Irrigating after application will accelerate initial green-up and will aid in the downward movement of granules into the turf canopy.
- Nutrite encourages responsible use of our products. Help do your part in protecting our rivers and lakes by following label directives and cleaning driveways and walkways after application. Do not apply to frozen ground.
